## EDSDK 2.13.2 Macintosh Version

Created By: Admin 04/26/2006 03:44 PM  
 Updated By: Admin 03/10/2014 02:31 PM

EDSDK 2.14 Windows and Macintosh versions support remote control, raw image conversion and downloading from select EOS Digital SLRs with DIGIC 5, DIGIC 4, DIGIC III or DIGIC II processors released over the past five years, starting with the EOS-1D Mark II and continuing through to the EOS Rebel T5.

### EDSDK 2.14 Macintosh Version Development Environment

---

OS: Mac OS X 10.6.8\* - 10.8  
 CPU: G4, G5 and Intel-based Macintosh  
 Memory: 1 GB or more  
 Hard Disk: 50MB or more available storage  
 Interface: USB 2.0 or IEEE1394 (according to camera)  
 Development Applications: X-Code 2.2 or later

### EDSDK 2.14 Macintosh Target Environment

---

OS: Mac OSX 10.6.8-10.8  
 CPU: G4, G5 and Intel-based Macintosh  
 Memory: 1 GB or more  
 Hard Disk: 50MB or more available storage  
 Interface: USB 2.0

Changes compared to EDSDK 2.13:

1. Added support for the EOS Rebel T5 and EOS M2.

For best results, we recommend using a broadband connection for downloads. Please Ctrl+Click on the links below and choose to download them directly to your computer. If you cannot download the files, please send an e-mail message to
