

</

DESCRIPTION

We are releasing the FWv2.21 for RX1 series (FW and updater) mentioned within TUN-2210-01.
Cyclone 4 is supported in FWv2.21, enabling support for three types of FPGAs (current Cyclone 3, alternative Cyclone 3, and Cyclone 4). In addition, 6x10 size prints are now supported for AI.

TARGET PRINTER

DS-RX1HS, IDW500, DP-ID600

DETAIL

It can now be used with printers equipped with three types of FPGAs (current Cyclone 3, alternative Cyclone 3, and Cyclone 4). In addition, for IAM customer Apple Industries, we now support 6x10 size prints.

The application in this release can be used with printers that have FWv2.** series applied. **Cannot be used for DS-RX1 (FWv1.** series) with current FPGAs.**

APPLIED TO MASS PRODUCTION

Mass production application to machines other than those equipped with Cyclone 4 will be announced as soon as it is known.
